1.0 INTRODUCTION

Maxymillian Technologies, Inc. (MT) has prepared the following site specific Appendix to the Severson Environmental Services, Inc. (SES) Waste Disposal Plan for the Low Temperature Thermal Desorption Unit (LTDD) at the Cornell-Dubilier Electronics (CDE) Superfund Site in South Plainfield, NJ.

The following attachments are provided to supplement the SES Waste Disposal Plan and meet the project submittal requirements.

Attachment A: Deer Park Security Overview
Attachment B: Aragonite Security Procedures
Attachment C: Clean Harbors DOT Security Plan
Attachment D: Clean Harbors Insurance Certificate
Attachment E: Clean Harbors Permit Numbers
Attachment F: Clean Harbors Transporter Permits

In order to meet the requirements of this plan, MT has compiled available information on the Security protocols, transportation permits, and insurance certificates essential for the proper disposal of waste from LTDD operations at the CDE site. This information is specific to each transportation and disposal company. Please note that MT considers this information to be confidential in nature.

Attachment A

Deer Park Security Overview

Clean Harbors Deer Park, LP

Overview of Security Plan

1.1. Perimeter Security

- 1.1.1. Clean Harbors Deer Park, LP is surrounded by a 6-foot cyclone fence topped by strands of barbed wire. All gates are routinely locked or manned by a Security Guard. The site is staffed with around-the-clock Security Guards who routinely patrol the site and monitor employee and visitor entrance and egress. The site has a Whelan alarm system for emergency events. Site employees and managers conduct daily inspections of all parts of the facility. As the facility operates twenty-four hours a day, seven days a week, the facility is well lit in all locations by either on-site or off-site lighting systems.

1.2. Facility Access

1.2.1. Access Control

Employees are required to show employee badges to gain entry to the facility. Visitors are required to obtain a visitor badge to gain facility access. Vehicles are allowed onto facility property only if they display a Clean Harbors vehicle tag or a Visitor Vehicle Pass. Facility access is limited to locations that are manned by Security Guards.

1.2.2. Visitors and Contractors

Clean Harbors has designated a corporate-wide security policy for all visitors and contractors at Clean Harbors' facilities. The system is based on levels of access depending on the intended activities of the visitor or contractor. The policy is described in detail in **Appendix B**. All Clean Harbors' facilities are required to follow this policy.

1.3. Hazardous Materials Security

1.3.1. Pickups and deliveries

Deliveries are all routed through the Receiving Yard (CET). There all vehicles and their cargo are routinely inspected to ensure the absence of threats related to the unit and its cargo.

1.3.2. Loaded vehicles

Commercial vehicles brought on-site are required to be kept unlocked with the keys in the ignition at all times. This policy provides immediate access to all commercial vehicles in the event of an emergency. Many loads have tamper-evident seals to ensure integrity of the waste. Loads are only brought into the facility by Clean Harbors Deer Park, LP drivers.

This minimizes facility risk to threats and emergency events. Additionally, the facility does the following:

- 1.3.2.1. Locks all company HAZMAT related equipment, and company offices where hazardous materials shipment information is located. Keys are stored in a secure area when unattended or not in use;
- 1.3.2.2. Conducts periodic inspections of HAZMAT vehicles, and company office buildings where hazardous materials are located to detect evidence of tampering or vandalism;
- 1.3.2.3. Parks HAZ MAT vehicles in a well lit, secure area when not in use;
- 1.3.2.4. Limits access to information regarding pickup/delivery schedules, routes and destinations to employees on a need to know basis;
- 1.3.2.5. Secures on-site rail cars containing hazardous materials against entry unless being loaded or unloaded; and,
- 1.3.2.6. Secures valves, manways and other fixtures on transportation vehicles loaded with hazardous materials when not in use.

1.3.3. Containers

Clean Harbors Deer Park, LP accepts a wide variety of containers: Railcars, tankers, bins, cylinders, drum of all sizes, boxes and other containers. These containers are required to be stored in designated areas. The containers are inspection on a daily basis and must be kept closed when stored.

1.3.4. Tanks and Other Equipment

The facility has many tanks located on-site. These tanks store many types of waste. All tanks are located within secure tank farms and are inspected on a daily basis. The tanks are in a highly visible work area routinely manned by site employees.

SECURITY PROCEDURES

Table of Contents

1.0	24-Hour Surveillance System	1
2.0	Barrier	1
3.0	Means to Control Entry.....	1
4.0	Warning Signs.....	2

1.0 24-Hour Surveillance System

The Clean Harbors Aragonite facility is occupied 24 hours per day. The guard station is manned during normal business hours. It is located at the main gate and is shown on the plot plan, drawing number D-034-M-002, Attachment 10. The gate is electrically controlled and can be opened/closed from the guard station. All visitors and trucks are logged by name, time of entrance, and egress.

During non-business hours, the main gate and front door will be locked. Visitors arriving during non-business hours will be able to communicate with either the Shift Supervisor or Control Board Operator by telephone or radio.

2.0 Barrier

The Clean Harbors Aragonite facility is fenced with an approximate eight-foot fence on the north, south, east, and west sides.

3.0 Means to Control Entry

The plant entrance is on the north side of the property. All vehicles must stop at the guard station to sign in and obtain routing information. Trucks will be checked to determine if they are scheduled and then routed to the appropriate area. Visitors must return their badges to the guard or receptionist who logs them out, when exiting the property. If an unscheduled truck arrives at the facility, the guard contacts the responsible department. The manager or designee will initiate the following procedures:

- Check the manifest.
- Call the generator of the waste to determine what his/her intentions are:
 - If the generator does not want Clean Harbors Aragonite to handle the waste, an alternate destination as directed by generator will be worked out.
 - If the generator would like Clean Harbors Aragonite to handle the waste, a series of events commences, including contract negotiation and pre-acceptance sampling to determine if the waste should be transferred and/or incinerated. The remaining steps are those outlined in the Waste Analysis Plan, Attachment 1.

Local law enforcement will be called for any trespassing.

4.0 Warning Signs

On either side of the entry point to the facility will be a sign: **DANGER - UNAUTHORIZED PERSONNEL KEEP OUT**. The lettering will be greater than three inches high and will be legible at 25 feet. The signs will also appear on the northern, southern, eastern, and western property fence lines. Drawing number D-034-M-005, Attachment 10, shows the placement of signs. The perimeter fence has signs, at a minimum, every 200 feet.

Other signs will be posted as required.

HM-232 Hazardous Materials Security Certification

On March 25, 2003, the Department of Transportation's Research and Special Programs Administration (RSPA) published Docket No. HM-232 final rule, "Hazardous Materials: Security Requirements for Offerors and Transporters of Hazardous Materials". The final rule requires hazardous materials shippers and carriers to develop and implement a security plan and to train hazmat employees on the specifics of the company's security plan.

The motor carrier, Clean Harbors Environmental Services, Inc. (Clean Harbors) is sending this notice to certify that Clean Harbors is in compliance with HM-232. Clean Harbors Environmental Services, Inc. is also sending this notice to assure that Clean Harbors authorized subcontracted transporters used to transport affected Clean Harbors' hazardous materials have implemented a security plan pursuant to 49 CFR 172.802.

For additional information regarding HM-232, the United States Department of Transportation has provided the following web address to assist in enhancing hazardous materials transportation and safety: http://hazmat.dot.gov/riskmgmt/hmt/hmt_security.htm

Sincerely,

A handwritten signature in black ink, appearing to read "Phil Retallick", written over a large, loopy oval shape.

Phil Retallick
Senior Vice President, Regulatory Affairs
